

VERIFIED

SECURE VISUAL DOCUMENTATION. SIMPLIFIED.

Bridging the gap between Broker and Client

The Verified photo inventory platform for the insurance industry creates a win-win situation for both policy holder and broker. With leading-edge technology and security, Verified offers peace of mind to the policyholder and a secure communication tool to share asset information and FNOL photos with the Broker and Insurer.

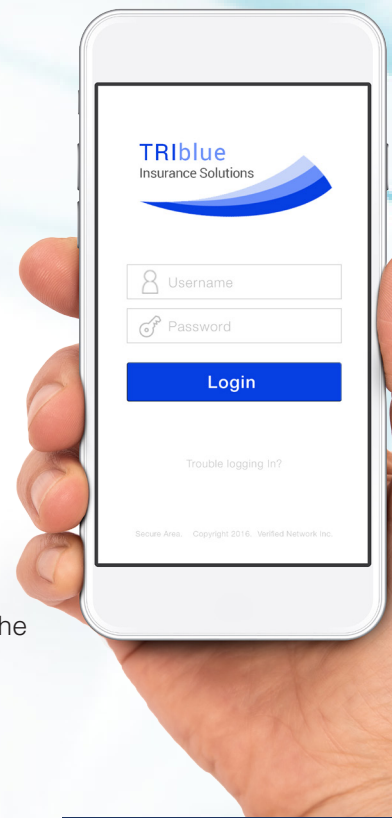

Policy Holder Inventory

Provided to the customer by the Insurance Broker, the Verified mobile App allows policy holders to photo document and catalogue their property, home contents and assets including boats, cars, recreational properties and other items. Our easy-to-use mobile and web-based platform allows the policy holder to instantly provide authentic photos and detailed documentation to the insurance provider in the case of a loss or damage event.

Preset the subject and other information about the photos captured¹; such as:

- Policy Number
- Location
- Description
- Asset Type
- Manufacturer
- Model Information

¹ Data fields are customizable and can be configured by the insurer or broker

First Notice of Loss (FNOL)

Policy Holder • Insurance Company Broker/Agent

To expedite an insurance claim the policy holder can photo document damaged items or property for which they are filing a claim and instantly share this information with their Insurance Company, Broker or Agent including items previously captured that may have been stolen.

Claims Adjustment Process

Policy Holder • Insurance Company Underwriter • Broker/Agent

During the claim adjustment process Verified can be used as a mobile workflow tool during loss/damage investigations to photo-document items and details related to a policy holder claim and securely share with the underwriter, insurance company or broker.

Key Benefits to Insurance Brokers

Verified offers significant value for the Insurance Broker to improve business and provide mutual benefit to the client, broker and insurer. These include:

- Secure communication between policy holder, broker and insurer
- Integrate FNOL and claim information into existing management systems
- Store asset inventories, receipts, invoices, work progress and more
- Easily capture images with the mobile apps
- Manage photos, documents and data
- Reduce processing times for client claims
- Provide value-added services to your clients
- Complete white-label solution available
- Integrated reporting tools

With the Verified mobile and web apps, policy holders receive your fully-branded white label application that enables you to effectively communicate, share and manage insurance photos and documents in a few easy steps.

Your clients will appreciate the value-added benefits of asset management and the secure communication of photos should a loss occur.

Stay in touch with clients through routine messaging and in-app notifications. A great marketing tool that will keep your clients engaged.
